

Automatic pool ball launcher

NEW PRODUCT DESIGN DIFFERS FROM ILLUSTRATIONS

WARNING

- This device contains a rechargeable lithium Ion battery and electronic components.
- Do not expose this device to liquid or high temperatures greater than 40°C
- Use only the provided battery charger.
- Please dispose of this device properly. Recycle electronic waste at collection points provided in your local region.
- Small parts may come off. Keep out of reach of children.

CAUTION

- **WATCH OUT FOR MOVING BALLS!** Avoid or prevent contact with the device to maintain ball placement consistency and prevent damage to equipment.
- **Handle with care.** Do not expose to moisture or extreme temperatures.
- Store the ramp against the included stiffening board to keep it from warping. If needed, the ramp can be gently bent back into position.

Automatically set up and organize balls, while practicing pocket billiard shots and strokes:

- Adjustable timer can be set to practice shooting a ball every 4 to 21 seconds.
- Lithium Ion rechargeable battery lasts up to 24 hours per charge.
- Launch ramp has a maximum capacity of eleven balls, and can be positioned and repositioned to perform almost any shot desired.

OPERATING INSTRUCTIONS

1. Attach the dispensing mechanism to the launch ramp.
2. Carefully load balls onto the launch ramp.
3. Press the button to initiate the shot sequence.
4. Turn the knob to adjust the rate balls are released onto the pool table surface.
5. Move the launch ramp to adjust the position of the ball.

TIPS

- Avoid ANY movement of the launch ramp to maintain ball placement consistency.
- Use multiple cue balls when practicing to save time and energy.
